About **PREZENTAR**

The birth of Prezentar happened when the founder struggled to create good looking presentations that didn't look like they were created in 1998 **using the current market solutions.**

Prezentar is template driven. With our global design team, we've created templates and themes specifically tailored to different industries and niches.

So rather than using generic templates from competitor products (like PowerPoint), users will be able select targeted template designs that were **purposefully crafted for that audience.**

This approach creates for a more engaging interaction, **increases conversions** and ultimately allows you to achieve the desired objective.
